

COMPANY OVERVIEW

Seven Tablets Inc is a nationwide software engineering and digital transformation firm with thirteen years of delivery experience. The company designs and builds custom software, artificial intelligence solutions, cloud and mobile applications, and enterprise platform implementations, and supplements client teams with specialized information technology staffing.

CORE COMPETENCIES

- **Custom Software Engineering:** Full lifecycle design, development, testing, and support of mission-specific applications and workflow automation.
- **Artificial Intelligence Development:** Applied artificial intelligence and machine learning solutions, from model development through production deployment.
- **Digital Transformation and Systems Integration:** Workflow automation, database consolidation, and process re-engineering that shorten operational cycles.
- **Cloud and Mobile Application Development:** Cloud-native and secure mobile solutions across enterprise and field environments.
- **Salesforce Platform Implementation:** Certified configuration, customization, and integration of the Salesforce platform.
- **Specialized Information Technology Staffing:** Augmentation of client teams with vetted software, cloud, and data engineering talent.

DIFFERENTIATORS

- **Proprietary artificial intelligence platform** used in-house to expedite development and lower build cost, rather than assembling tooling per project.
- **Business-outcome-first method:** the why, what, and how are articulated and stakeholder-aligned before any code is written.
- **Rapid deployment** from reusable platform components, shortening time from award to working software.
- **Full-stack delivery in one team:** artificial intelligence, custom software, cloud, mobile, and platform work delivered without subcontracting the core build.

RELEVANT COMMERCIAL EXPERIENCE

Developed Mobile Software Application

Rebel Athletic • \$300,000 • 6 months

Built a mobile application that captures body measurements for custom cheerleading apparel. Reduced the client's operating costs by \$400,000 per year.

Digital Transformation, Automated Workflow and Database Consolidation

PHP Agency • \$2,300,000 • 15 months

Delivered a digital transformation program to automate workflow, consolidate databases, and shorten the sales cycle. Increased revenue by 200% over two years and profitability by 40%.

Artificial Intelligence Software Implementation

Client name available on request • \$200,000

Implemented an artificial intelligence software solution that reduced the client's operating expenses by \$500,000 per year.

Representative clients: Sirius XM, Regions Bank, TD Bank.
